

# Logic in the Home—Activity Guide Two

---

*A Colloquium for Parents*

## Try This!

Another good exercise to try out by yourself or with one of your kids is to take an subject you are teaching him and formulate the reasons that you accept some of the basic assumptions that dictate what you teach.

The idea, as discussed in the video presentation, is to learn to more honestly and accurately distinguish between those things that we teach by just passing on beliefs and those which we teach by giving the reasons for what we hold—i.e. by giving knowledge. Beliefs, or better opinions, are fine and necessary, but we should always recognize them for what they are.

## Questions?

Send me an email at [the.rolling.acres.school@gmail.com](mailto:the.rolling.acres.school@gmail.com)

- Be sure to include your name and the name of the colloquium in the subject line of the email, please.
