## Summer Extension Information Sheet, 2021-22

The Summer Extension for 2021-22 is a one-month work period, running from the close of school, May 20, until June 17. The extension is intended as an opportunity for students who have struggled with the pace of the school year or the workload. It can be an ideal device for students who have missed a section of the school year, but otherwise have performed well. If a student has struggled with comprehension and retention of content in a course, the extension does not represent an ideal opportunity for improvement of understanding. Parents are encouraged to discuss the option with the headmaster before proceeding, even if their student meets the basic requirements.

The basic requirements for summer extensions are as follows: (1) students must have a score of at least 65% in the course; (2) students must have completed at least two-thirds of the course work in the class.

Parents must submit a written request, naming the classes for which the extension is requested, to the headmaster via email at [the.rolling.acres.school@gmail.com](mailto:the.rolling.acres.school@gmail.com), no later than May 13.

The grade items that may be submitted during summer extension are as follows:

- All automated quizzes from units 1-30 will remain accessible and can be retaken for mastery.
- Any weekly homework assignment for units 1-30.
- Any long form, multi-week assignments (special
- Review quizzes and exams may not be submitted without specific permission.

Once a request has been approved, the protocol to be followed is:

- Submit the "Summer Extension Enrollment Form," listing the courses and assignments that are to be included, via email and submit payment.
- After the work of the semester is complete, students may immediately begin work on their summer extension assignments.
- After the ordinary course calendar is complete, the extension students will simply retain access to their course suites.
- Next, uploads will be created for the summer extension work. Students may submit the work at any time during the summer extension period once they are available.
- At the end of the extension period, the submitted work will be graded, a new course grade will be calculated, and a new transcript will be generated by July 1.

No tutoring or feedback is available during the extension.

An administrative fee of \$50 per course and a per item grading fee of \$15 apply (assignments and, if permitted, review quizzes and exams). There is no per item fee for automated quizzes.
